The DK Children’s Illustrated Encyclopedia
Dorling Kindersley Publishing, Incorporated 1994-12-01

**Philosophy A Visual Encyclopedia**
DK 2020-11-10
The perfect book for young readers looking to explore some of life’s biggest questions. Thousands of years ago, ancient philosophers asked some important questions: "What is real?", "What is the point of my existence?", "Why is there evil in the world?", and "What can I know?" These questions have gone on to spark passionate debates about our existence and how we understand the world around us. In this engaging and accessible introduction to philosophy, readers aged 11+ will be introduced to a variety of philosophical ideas through the teachings of Plato, Confucius, Simone de Beauvoir, and many more. Vibrant, reader-friendly illustrations bring the history of ideas and thinking to life, and provide topics for reflection and debate. With biographies of the most influential philosophers from around the world, young readers will explore the questions that have been fundamental to the development of scientific study, logical thinking, religious beliefs, freedom in society, and much more. Thought experiments peppered throughout will help to connect readers with the theories presented so they can apply them to their own lives.

Did you know that you are made up of 100 trillion cells? Learn about blood vessels (capillaries, veins, and arteries) which, if they were laid out end to end, would wrap around the Earth twice! Find out what makes a balanced diet - after all, you will eat about 20 tonnes of food in your entire life! See what part of the brain makes you appreciate music (it’s the right side). There are also fun quizzes, so you can assess your own personality and test your logical and reasoning skills. An international best-seller since 2012, Human Body: A Children’s Encyclopedia has now been fully updated in line with the latest research. Combining clear descriptions of human biology with awesome photographs, graphics, and CGI artworks, make your way from the skin, muscles, organs, bones, right down to your cells and DNA. From homework projects to just reading for curiosity, this comprehensive encyclopedia is filled with everything that you need to know about what makes your body tick.

*Mots de L'histoire*
Jacques Rancière 1994
History in our day is still a story, and yet one from which we expect to tell the truth - not just the facts, the names and events of the past, but the invisible order and forces behind them. How can the language of history balance these seemingly contrary tasks - the narrative, the scientific, and the political? This is the question Jacques Ranciere explores in "The names of history", a meditation on the poetics of historical knowledge. In the works of writers from Jules Michelet to Fernand Braudel, Ranciere traces an ongoing revolution in historical study, a movement that challenged, in the practice of language, the opposition of science and literature. By way of a commentary on Erich Auerbach, he shows how fictional narrative intertwines with historical narrative to produce a "truth" that retains mythical elements. The poetics of knowledge Ranciere develops here is an attempt to identify the literary procedures by which historical discourse escapes literature and gives itself the status of a science. His book is also an appreciation of Braudel, whose work in the Annales school greatly advanced this project. Ranciere follows and extends Braudel's discursive production of new agencies of history, which accounts for both the material conditions in which history takes place and the language in which it is written.

**The New Children's Encyclopedia**
DK 2019-01-08
This stimulating and comprehensive encyclopedia for children ages 8-12 provides answers to all the questions kids love to ask. Each chapter is jam-packed with maps, charts, timelines, diagrams, beautiful images, and amazing facts.
