

# Hellenistic Pottery The Plain Wares Agora Xxxiii Athenian

Eventually, you will no question discover a further experience and capability by spending more cash. nevertheless when? pull off you tolerate that you require to get those all needs taking into account having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will lead you to understand even more in this area the globe, experience, some places, subsequently history, amusement, and a lot more?

It is your completely own epoch to performance reviewing habit. in the middle of guides you could enjoy now is **Hellenistic Pottery The Plain Wares Agora Xxxiii Athenian** below.

The Symposium in Context Kathleen M. Lynch 2011 Based on the author's thesis (Ph.D.)--University of Virginia, 2009.

**Ancient Economies of the Northern Aegean** Zosia H. Archibald 2013-11 Using the most up-to-date methods and theories about ancient economies, Archibald explores how the cultural and economic dynamics of the ancient kingdoms of Macedon and Thrace worked.

**From Cave to Dolmen** Domenica Gullì 2014-12-31 Bringing together the scientific contributions of a wide panel of Sicilian and mainland Italian specialists in prehistory, this book focuses on the Sciacca region and its landscape which is extraordinarily rich in natural geological phenomena and associated archaeological activity.

Hellenistic Pottery Susan I. Rotroff 2006 This book presents 847 examples of Hellenistic plain wares from the well-stratified excavations of the Athenian Agora. These pieces include oil containers, household shapes, and cooking pottery.

**Figurine Makers of Prehistoric Cyprus** Edgar Peltenburg 2019-07-31 The Chalcolithic period in Cyprus has been known since Porphyrios Dikaios' excavations at Erimi in the 1930s and through the appearance in the antiquities market of illicitly acquired anthropomorphic cruciform figures, often manufactured from picrolite, a soft blue-

green stone. The excavations of the settlement and cemetery at Souskiou Laona reported on in this volume paint a very different picture of life on the island during the late 4th and early 3rd millennia BC. Burial practices at other known sites are generally single inhumations in intramural pit graves, only rarely equipped with artifacts. At Souskiou, multiple inhumations were interred in deep rock-cut tombs clustered in extra-mural cemeteries. Although the sites were also subjected to extensive looting, excavations have revealed complex multi-stage burial practices with arrangements of disarticulated and articulated burials accompanied by a rich variety of grave goods. Chief among these are a multitude of cruciform figurines and pendants. This unusual treatment of the dead, which has not been recorded elsewhere in Cyprus, shifts the focus from the individual to the communal, and provides evidence for significant changes involving kinship group links to common ancestors. Excavations at the Laona settlement have furnished evidence suggesting that it functioned as a specialised center for the procurement and manufacture of picrolite during its early phase. The subsequent decline of picrolite production and the earliest known occurrence of new types of ornaments, such as faience beads and copper spiral pendants, attest to important changes

involving the transformation of personal and social identities during the first centuries of the 3rd millennium BC, a topic that forms a central theme of this final report on the site.

### **The Archaeology of Roman Portugal in its Western Mediterranean Context**

Tesse D. Stek 2022-07-31 The Archaeology of Roman Portugal aims to contribute to the wider debate on Roman imperialism and expansionism, by bringing to the fore a much-underrepresented area of the Roman empire, at least in English-language scholarship: its westernmost edge in modern day Portugal. Highlighting the perspective from Roman Portugal will contribute to our understanding of the Roman empire, because it presents both an extraordinary landscape in the sense of economic opportunities (ocean resources, marble and metal mining) and settlement history. The volume aims to present new data and insights from both archaeology and ancient history, and to discuss their significance for our understanding of Roman expansion and imperialism. A key goal of the volume is to discuss how the Portuguese panorama compares to other areas of the Iberian peninsula. An explicit goal of the volume is to better integrate Portuguese scholarship in the academic debate on the Mediterranean Roman world, and to contextualize it firmly in the wider Iberian and Western Mediterranean context. Therefore, chapters are produced by internationally diverse scholars in archaeology and ancient history from Portugal, Spain, Germany, the UK, the US, the Netherlands, Belgium, and Italy. With a view to assess the potential of integrating best practices in archaeological approaches and methodology, different national and disciplinary research traditions and historical frameworks will be explicitly discussed.

### **Pottery in the Archaeological Record**

Mark L. Lawall 2011-12-31 Archaeologists are increasingly focusing on the transformation of artifacts from their use in the past to their appearance in the archaeological record, trying to identify the

natural and cultural processes that created the archaeological record we study today. In Classical Archaeology, attention to these processes received an impetus by J. Theodore Pena's 2007 monograph, *Roman Pottery in the Archaeological Record*, which considered how ceramic vessels were made, used and stayed in use serving various secondary purposes, before finally being discarded. Pena relied mainly on evidence from Roman Italy, which raises the question of the impact of similar cultural forces on pottery from other periods and places. His work accentuates the need to continue the process of building and developing explicit interpretive models of ceramic life-histories in Mediterranean archaeology. With a view to beginning to address these challenges, the editors invited a group of specialists in the pottery of Greece and the rest of the Eastern Mediterranean to a colloquium in Athens in June 2008, asking the contributors to reconsider Pena's general models, approaches and examples from their own particular geographic and cultural perspectives. This publication constitutes the proceedings of this colloquium.

**Ceramics, Cuisine and Culture** Michela Spataro 2015-10-31 The 23 papers presented here are the product of the interdisciplinary exchange of ideas and approaches to the study of kitchen pottery between archaeologists, material scientists, historians and ethnoarchaeologists. They aim to set a vital but long-neglected category of evidence in its wider social, political and economic contexts. Structured around main themes concerning technical aspects of pottery production; cooking as socioeconomic practice; and changing tastes, culinary identities and cross-cultural encounters, a range of social economic and technological models are discussed on the basis of insights gained from the study of kitchen pottery production, use and evolution. Much discussion and work in the last decade has focussed on technical and social aspects of coarse ware and in particular kitchen ware. The chapters in this volume contribute to this debate,

moving kitchen pottery beyond the Binfordian 'technomic' category and embracing a wider view, linking processualism, ceramic-ecology, behavioral schools, and ethnoarchaeology to research on historical developments and cultural transformations covering a broad geographical area of the Mediterranean region and spanning a long chronological sequence.

### **The Temple Complex at Horvat Omrit J.**

Andrew Overman 2021-09-13 This report from the Omrit temple excavations presents artifacts (e.g., ceramics, frescoes, coins, etc.) recovered in the excavations of the Roman period sanctuary in northern Israel, and discusses the stratigraphy, building phases, and dating of the complex.

### **The Agora Bone Well** Maria A. Liston

2019-01-22 Even though Dorothy Thompson excavated the Agora Bone Well in 1938, the well and its remarkable finds have never been fully studied until now. Located outside the northwest corner of the Athenian Agora and dating to the second quarter of the 2nd century B.C., the well contained the remains of roughly 460 newborn infants, as well as a few older individuals. Also found in the well were the bones of over 150 dogs and an assortment of other animals, plus various artifacts, including an intriguing herm (treated here by Andrew Stewart) and an ivory chape. In addition to a thorough examination of the contents of the well, the authors provide a thoughtful analysis of the neighborhood in which the well was located and carefully compare the deposit with similar accumulations found elsewhere in the Mediterranean. The product of close cooperation between archaeological, palaeoanthropological, and faunal scholars, this interdisciplinary work will be of interest to a large audience across a variety of fields.

**Stymphalos** Gerald P. Schaus 2014 The buildings and artefacts uncovered by Canadian excavations at Stymphalos (1994-2001) shed light on the history and cult of a small sanctuary on the acropolis of the ancient city. The thirteen detailed

studies collected in *Stymphalos: The Acropolis Sanctuary* illuminate a variety of aspects of the site. Epigraphical evidence confirms that both Athena and Eileithyia, goddess of childbirth, were worshipped in the sanctuary between the fourth and second centuries BCE. The temple and service buildings are modest in size and materials, but the temple floor and pillar shrine suggest that certain stones and bedrock outcrops were held as sacred objects. Earrings, finger rings, and other jewelry, along with almost 100 loomweights, indicate that women were prominent in cult observances. Many iron projectile points (arrowheads and catapult bolts) suggest that the sanctuary was destroyed in a violent attack around the mid-second century, possibly by the Romans. A modest sanctuary in a modest Arcadian city-state, the acropolis sanctuary at Stymphalos will be a major point of reference for all archaeologists and historians studying ancient Arcadia and all southern Greece in the future.

**The Athenian Agora** Laura Gawlinski 2014-06-18 Written for the general visitor, the Athenian Agora Museum Guide is a companion to the 2010 edition of the Athenian Agora Site Guide and leads the reader through all of the display spaces within the Stoa of Attalos in the Athenian Agora — the terrace, the ground-floor colonnade, and the newly opened upper story. The guide also discusses each case in the museum gallery chronologically, beginning with the prehistoric and continuing with the Geometric, Archaic, Classical, Hellenistic, Roman, and Byzantine periods. Hundreds of artifacts, ranging from common pottery to elite jewelry held in 81 cases, are described and illustrated in color for the very first time. Through focus boxes, readers can learn about marble-working, early burial practices, pottery production, ostracism, home life, and the wells that dotted the ancient site. A timeline, maps, and plans accompany the text. For those who wish to learn more about what they see in the museum, a list of further reading follows

each entry.

Cosa Kathleen Slane 2019-01-03 This long-awaited volume presents the work of Elizabeth Lyding Will on the important group of transport amphoras found at Cosa. This town has been widely recognized as a prototypical colony of the later Roman Republic and a source for trade with Gaul and Spain, so this publication of its finds has important implications for archaeologists and historians of the ancient world. Will's initial work was on Latin amphora-stamps in the eastern Mediterranean, and through the 1960s and 1970s she developed an amphora typology based on materials found in the region and at Cosa. What has not been appreciated is that this typology was not limited to stamped Republican amphoras but also included unstamped vessels, such as imperial Spanish, African, and eastern amphoras dating as late as the fifth century CE. This book shows that Will was far ahead of her time in documenting the Mediterranean trade in commodities carried in amphoras: her work not only provides a record of the amphoras found on the town-site of Cosa, but also includes a comparison between the finds from the port and the town. At the time of Will's death, her manuscript consisted of a typed catalogue of the amphora stamps from Cosa and an equal number of unstamped vessels, but was missing important elements. On the basis of extensive notes and photographs, Kathleen Warner Slane has reviewed and updated the manuscript, adding type descriptions and footnotes to materials that have appeared since Will's death as well as a framing introduction and conclusions. Appendices highlight an Augustan amphora dump on the Arx and add a catalogue of the Greek amphora stamps found at Cosa. Cosa: The Roman and Greek Amphoras will be of interest to scholars and students of Rome and its system of colonies, and also to those interested in Greek and Roman archaeology and trade in the ancient world. Art Book News Annual, volume 4: 2008  
Art Book News Annual, volume 4: 2008  
**Roman Pottery in the Near East: Local**

**Production and Regional Trade** Bettina Fischer-Genz 2014-03-15 Presents papers presented at an international workshop dedicated to the study of Roman common ware pottery in the Near East held in Berlin on 18th and 19th February 2010.

**Spear-Won Land** Andrea M. Berlin 2019 More than a dozen prominent scholars offer comprehensive assessments of Hellenistic Sardis, a critical site in western Asia Minor that was one of the most important political centers of both the Aegean and Near Eastern worlds before it was governed as part of the Roman Empire.

**Hellenistic Pottery** Sarah A. James 2018-08-20 Using deposits recently excavated from the Panayia Field, this volume substantially revises the absolute chronology of Corinthian Hellenistic pottery as established by G. Roger Edwards in *Corinth VII.3* (1975). This new research, based on quantitative analysis of over 50 deposits, demonstrates that the date range for most fine-ware shapes should be lowered by 50-100 years. Contrary to previous assumptions, it is now possible to argue that local ceramic production continued in Corinth during the interim period between the destruction of the city in 146 B.C. and when it was refounded as a Roman colony in 44 B.C. This volume includes detailed shape studies and a comprehensive catalogue. With its presentation of this revised "Panayia Field chronology," *Corinth VII.7* is a long-awaited and much-needed addition to the Corinth series.

Butrint 7 David Hernandez 2020-12-14 This volume brings together unpublished Italian and Albanian archaeological reports and new archaeological studies from recent fieldwork that throw new light on the archaeology and history of the Pavllas River Valley, the Mediterranean alluvial plain in the territory of Butrint, ancient Buthrotum, in southwestern Albania. It gives prominence for the first time to two important sites, Kalivo and Çuka e Aitoit, which are here reinterpreted and shown to have played major roles in the early history of Butrint as it evolved in the later first

millennium BC to emerge as the key city of Chaonia in Epirus. Butrint 7 also presents the full excavation report of the Late Bronze Age and Hellenistic fortified site of Mursi, in addition to other Butrint Foundation surveys and excavations in the hinterland of Butrint, including the Roman villa maritima at Diaporit, the villa suburbana on the Vrina Plain, and Roman sites on Alinura Bay and at the Customs House, as well as new surveys of the early modern Triangular Fortress and a survey to locate the lost Venetian village of Zarópulo. The volume also features a new study of the Hellenistic bronze statuette of Pan found on Mount Mile and of his sanctuary at Butrint. The volume concludes with a comprehensive reassessment of the Pavllas River Valley in relation to Butrint, from the Palaeolithic to the modern eras, examining how dominion, territory, environment and the 'corrupting sea' reshaped Butrint and its fluvial corridor diachronically and particularly brought profound territorial, economic and social alterations under the Roman Empire.

*Roman Crete: New Perspectives* Jane E. Francis 2016-05-31 The last several decades have seen a dramatic increase in interest in the Roman period on the island of Crete. Ongoing and some long-standing excavations and investigations of Roman sites and buildings, intensive archaeological survey of Roman areas, and intensive research on artifacts, history, and inscriptions of the island now provide abundant data for assessing Crete alongside other Roman provinces. New research has also meant a reevaluation of old data in light of new discoveries, and the history and archaeology of Crete is now being rewritten. The breadth of topics addressed by the papers in this volume is an indication of Crete's vast archaeological potential for contributing to current academic issues such as Romanization/acclulturation, climate and landscape studies, regional production and distribution, iconographic trends, domestic housing, economy and trade, and the transition to the late-Antique era. These

papers confirm Crete's place as a fully realized participant in the Roman world over the course of many centuries but also position it as a newly discovered source of academic inquiry.

### **The Archaeology of Roman Surveillance In the Central Alentejo, Portugal**

Joey Williams 2017-02-21 During the first century B.C.E. a complex system of surveillance towers was established during Rome's colonization of the central Alentejo region of Portugal. These towers provided visual control over the landscape, routes through it, and hidden or isolated places as part of the Roman colonization of the region. As part of an archaeological analysis of the changing landscape of Alentejo, Joey Williams offers here a theory of surveillance in Roman colonial encounters drawn from a catalog of watchtowers in the Alentejo, the artifacts and architecture from the tower known as Caladinho, and the geographic information systems analysis of each tower's vision. Through the consideration of these and other pieces of evidence, Williams places surveillance at the center of the colonial negotiation over territory, resources, and power in the westernmost province of the Roman Empire.

*The Hellenistic West* Jonathan R. W. Prag 2013-10-24 Although the Hellenistic period has become increasingly popular in research and teaching in recent years, the western Mediterranean is rarely considered part of the 'Hellenistic world'; instead the cities, peoples and kingdoms of the West are usually only discussed insofar as they relate to Rome. This book contends that the rift between the 'Greek East' and the 'Roman West' is more a product of the traditional separation of Roman and Greek history than a reflection of the Hellenistic-period Mediterranean, which was a strongly interconnected cultural and economic zone, with the rising Roman republic just one among many powers in the region, east and west. The contributors argue for a dynamic reading of the economy, politics and history of the central and western Mediterranean beyond Rome, and in doing so problematise

the concepts of 'East', 'West' and 'Hellenistic' itself.

*Greek Theatre in the Fourth Century BC* Eric Csapo 2014-06-18 Age-old scholarly dogma holds that the death of serious theatre went hand-in-hand with the 'death' of the city-state and that the fourth century BC ushered in an era of theatrical mediocrity offering shallow entertainment to a depoliticised citizenry. The traditional view of fourth-century culture is encouraged and sustained by the absence of dramatic texts in anything more than fragments. Until recently, little attention was paid to an enormous array of non-literary evidence attesting, not only the sustained vibrancy of theatrical culture, but a huge expansion of theatre throughout (and even beyond) the Greek world. Epigraphic, historiographic, iconographic and archaeological evidence indicates that the fourth century BC was an age of exponential growth in theatre. It saw: the construction of permanent stone theatres across and beyond the Mediterranean world; the addition of theatrical events to existing festivals; the creation of entirely new contexts for drama; and vast investment, both public and private, in all areas of what was rapidly becoming a major 'industry'. This is the first book to explore all the evidence for fourth century ancient theatre: its architecture, drama, dissemination, staging, reception, politics, social impact, finance and memorialisation.

**Cosa** Jacquelyn Collins-Clinton 2020-04-06 Cosa, a small Roman town, has been excavated since 1948 by the American Academy in Rome. This new volume presents the surviving sculpture and furniture in marble and other stones and examines their nature and uses. These artifacts provide an insight into not just life in a small Roman town but also its embellishment mainly from the late Republic and through the early Empire to the time of Hadrian. While public statuary is not well preserved, stone and marble material from the private sphere are well represented; domestic sculpture and furniture from the third century BCE to the

first CE form by far the largest category of objects. The presence of these materials in both public and private spheres sheds light on the wealth of the town and individual families. The comparative briefness of Cosa's life means that this material is more easily comprehensible as a whole for the entire town as excavated, compared for instance to the much larger cities of Pompeii and Herculaneum.

**Pottery from Roman Malta** Maxine Anastasi 2019-10-24 A comprehensive study of Maltese pottery forms from key stratified deposits spanning the 1st century BC to mid-4th century AD. Ceramic material is analysed and quantified in a bid to understand Maltese pottery production during the Roman period, and trace the type and volume of ceramic-borne goods that were circulating the central Mediterranean.

**Elenchus of Biblica** 1998

**The Athenian Agora** John McK. Camp II 2010-02-28 This definitive guide to the archaeological remains in the civic and commercial center of ancient Athens is an essential companion to the interested visitor, as well as to students of the topography of the classical city. A large-scale map provides an overview of the site, keyed to descriptions and plans of every monument still visible from the majestic Temple of Hephaistos to the utilitarian Great Drain. The fifth edition retains many of the elements that made the earlier editions so popular, but also takes full account of new discoveries and recent scholarship. It is intended for visitors touring the site, and is arranged topographically, monument by monument. Also included are an overview of the historical development of the site and a history of the excavations.

*The City of New Halos and its Southeast Gate* H. Reinder Reinders 2014-09-18 This volume presents a detailed description and analysis of the structure and layout of the Southeast Gate of New Halos, a Hellenistic city in Thessaly (Greece). The gate was excavated in the period 1995-2006. An impressive enceinte, 4.7 km long and

fortified with at least 120 towers, surrounded the lower and upper town of Halos. Excavation of a series of houses in the lower town revealed that the city, probably founded in 302 BC by Demetrios Poliorketes, was abandoned after an earthquake around 265 BC. The Southeast Gate, flanked by two towers, gave access to the city from the south. Numerous artefacts show that after the earthquake the gate complex was used as a large farmstead where agricultural produce was processed and stored. Today, the walls of this well-preserved courtyard gate still stand two to five metres above the bedrock.

*A Study of the Circulation of Ceramics in Cyprus from the 3rd Century BC to the 3rd Century AD* John Lund 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods. The island was by then no longer divided into kingdoms but unified politically, first under Ptolemaic Egypt and later as a province in the Roman Empire. Submission to foreign rule was previously thought to have diluted - if not obliterated - the time-honoured distinctive Cypriot character. The ceramic evidence suggests otherwise. The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks, a division that also seems reflected by other evidence. The similarities in material culture, exchange patterns and preferential practices are suggestive of a certain level of regional collective self-awareness. From the 1st century BC onwards, Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares, which seem ultimately to have put many of the indigenous makers of similar products out of business - or forced them to modify their output. Also, the ceramic record gradually became less diverse during the Roman Period than before - developments which we today might be inclined to view as symptoms of an early form of globalisation.

**Late Classical Pottery from Ancient Corinth** Ian McPhee 2012-10-24 In 1971, in the southwestern area of the Roman Forum

of Corinth, a round-bottomed drainage channel was discovered filled with the largest deposit of pottery of the 4th century ever found in the city, as well as some coins, terracotta figurines, and metal and stone objects. This volume publishes the pottery and metal and stone objects, and includes a re-examination of the coins by Orestes Zervos. Some of the cooking ware has been subjected to neutron activation analysis, and a statistical analysis of all recovered pottery has been completed. The contents of Drain 1971-1 are important for the function of the Classical buildings in this part of Corinth, especially Buildings I and II, and for the chronology of the renovation program that included the construction of the South Stoa, which was probably not built before the last decade of the 4th century.

*The Athenian Agora* Homer A. Thompson 1986-01-01

**New Approaches to the Archaeology of Beekeeping** David Wallace-Hare 2022-02-17 17 papers take a holistic view of beekeeping archaeology (including honey, wax, associated products, hive construction, and trade) in one large interconnected geographic region, the Mediterranean, central Europe, and the Atlantic Façade. The book serves as a handbook for current and future researchers considering the archaeology of beekeeping.

**Pottery, Peoples and Places** Pia Guldager Bilde 2014-01-31 The late Hellenistic period, spanning the 2nd and early 1st centuries BC, was a time of great tumult and violence thanks to nearly incessant warfare. At the same time, the period saw the greatest expansion of Hellenistic Greek culture, including ceramics. Papers in this volume explore problems of ceramic chronology (often based on evidence dependent on the violent nature of the period), survey trends in both production and consumption of Hellenistic ceramics particularly in Asia Minor and the Pontic region, and assess the impact of Hellenistic ceramic culture across much of the eastern Mediterranean and into the Black Sea. *The Archaeology of Roman Macedonia*

Vassilis Evangelidis 2022-07-15 Macedonia is a region that provides its own intriguing questions due to its position on the fringe of the classical Greek world. It is also an area which is of special interest to students of history and archaeology of Roman period Greece since it was the first to be incorporated in the Roman state.

Macedonia shared a similar path of development with Achaëa during the imperial period. As provinces far from productive zones and frontiers, both played a minor role in the imperial administrative structure. Beneath this similarity, however, lie many differences: in Macedonia's proximity to the Balkans, its early contact with Rome, its relatively low level of urbanization, its multicultural context and its sizeable economy, which played their own role in the formation of the urban and rural environments. With a focus on elements of the built environment and human habitat, this book examines old and new archaeological evidence to present a concise overview of the archaeology of the area and develop a better perception of the region in terms of archaeology of the built environment, architecture and architectural influences, urbanization and use of land and resources from the 2nd century BCE to the early 4th century CE. Driven by a set of key questions that are addressed through the archaeological evidence, the book explores key issues in understanding the archaeology of the area, like the role of architectural tradition and innovation, the interdependency between practical bases of architecture and socio-cultural aspects, the exploitation of local resources, and the role of external influences. Special importance is given to the interaction of Greek, Roman and local cultures and the ways that the formation of the built environment eventually led to the assimilation of ideas from East and West in terms of workmanship, use of materials, design and function.

**Excavations at Maresha Subterranean Complex 169** Ian Stern 2019-08-22 Tel Maresha is located in the foothills of Israel's Judæan Mountains. It was

established in the Iron Age II (circa 700 BCE) and is mentioned in the Hebrew Bible (Josh 15:44; I Chron. 2:42). But it was mainly a Hellenistic-period town - a major Idumean political and administrative center. One of the unique and fascinating aspects of Maresha is its subterranean city - hundreds of underground galleries and chambers filled to the gills with artifacts. This volume is a report of the excavations of one of these rich subterranean complexes - SC 169 - which contained a full corpus of Hellenistic pottery forms - both local and exotic altars, figurines, amulets, seals and seal impressions, hundreds of inscriptions in Greek and Aramaic, coins, jewelry and much more. These finds tell the story of an affluent cosmopolitan society comprised of Idumeans, Phoenicians, Greeks, and Jews, who lived together in a vibrant urban setting until the city was destroyed, probably by the Jewish Hasmonean kingdom in 104 BCE.

**The Chora of Metaponto 6** Francesca Silvestrelli 2016-08-02 The sixth volume in the Institute of Classical Archaeology's series on the rural countryside (chora) of Metaponto is a study of the Greek settlement at Sant'Angelo Vecchio. Located on a slope overlooking the Basento River, the site illustrates the extraordinary variety of settlements and uses of the territory from prehistory through the current day. Excavators brought to light a Late Archaic farmhouse, evidence of a sanctuary near a spring, and a cluster of eight burials of the mid-fifth century BC, but the most impressive remains belong to a production area with kilns. Active in the Hellenistic, Late Republican, and Early Imperial periods, these kilns illuminate important and lesser-known features of production in the chora of a Greek city and also chronicle the occupation of the territory in these periods. The thorough, diachronic presentation of the evidence from Sant'Angelo Vecchio is complemented by specialist studies on the environment, landscape, and artifacts, which date from prehistory to the post-medieval period. Significantly, the evidence spans the range

of Greek site types (farmhouse, necropolis, sanctuary, and production center) as well as the Greek dates (from the Archaic to Early Imperial periods) highlighted during ICA's survey of the Metapontine chora. In this regard, Chora 6 enhances the four volumes of *The Chora of Metaponto 3: Archaeological Field Survey—Bradano to Basento* and provides further insight into how sites in the chora interacted throughout its history.

*Rei Cretariae Romanae Fautorum: Acta 46* Catarina Viegas 2020-12-31 Acta 46 comprises 64 articles. Out of the 120 scheduled lectures and posters presented at the 31st Congress of the *Rei Cretariae Romanae Favtores*, 61 are included in the present volume, to which three further were added. Given the location of the conference in Romania it seems natural that there is a particular focus on the Balkans and Danube.

*The Chora of Metaponto 4* Erminia Lapadula 2012-01-25 "Institute of Classical Archaeology, Packard Humanities Institute."

*The Chora of Metaponto 5* Elisa Lanza Catti 2014-08-15 This volume in the Institute of Classical Archaeology's series on rural settlements in the countryside (chora) of Metaponto is a study of the fourth-century BC farmhouse known as Fattoria Fabrizio, located in the heart of the surveyed chora in the Venella valley (at Ponte Fabrizio). This simple structure richly illustrates the life of fourth-century BC Metapontine farmers of modest means. Thorough interpretations of the farmhouse structure in its wider historical and socioeconomic contexts are accompanied by comprehensive analyses of the archaeological finds. Among them is detailed evidence for the family cult, a rare

archaeological contribution to the study of Greek religion in Magna Grecia. The entire range of local Greek ceramics has been studied, along with a limited number of imports. Together they reveal networks within the chora and trade beyond it, involving indigenous peoples of southern Italy, mainland Greeks, and the wider Mediterranean world. Along with the studies of traditional archaeological finds, archaeobotanical analyses have illuminated the rural economy of the farmhouse and the environment of the adjacent chora. Abundant Archaic pottery also documents an important occupation, during the first great flowering of the chora in the sixth century BC. This study provides an ideal complement to the four volumes of *The Chora of Metaponto 3: Archaeological Field Survey—Bradano to Basento* and an eloquent example of hundreds of farmhouses of this date identified throughout the chora by their surface remains alone.

**International Bibliography of Historical Sciences 2006** Massimo Mastrogregori 2010-11-26 Die IBOHS verzeichnet jährlich die bedeutendsten Neuerscheinungen geschichtswissenschaftlicher Monographien und Zeitschriftenartikel weltweit, die inhaltlich von der Vor- und Frühgeschichte bis zur jüngsten Vergangenheit reichen. Sie ist damit die derzeit einzige laufende Bibliographie dieser Art, die thematisch, zeitlich und geographisch ein derart breites Spektrum abdeckt. Innerhalb der systematischen Gliederung nach Zeitalter, Region oder historischer Disziplin sind die Werke nach Autorennamen oder charakteristischem Titelhauptwort aufgelistet."

*Hellenistic Pottery: Text* Susan I. Rotroff 1997
