Road to Valor Aili McConnon 2012-06-12 The inspiring, against-the-odds story of Gino Bartali, the cyclist who made the greatest comeback in Tour de France history and secretly aided the Italian resistance during World War II Gino Bartali is best known as an Italian cycling legend who not only won the Tour de France twice but also holds the record for the longest time span between victories. In *Road to Valor*, Aili and Andres McConnon chronicle Bartali's journey, from an impoverished childhood in rural Tuscany to his first triumph at the 1938 Tour de France. As World War II ravaged Europe, Bartali undertook dangerous activities to help those being targeted in Italy, including sheltering a family of Jews and smuggling counterfeit identity documents in the frame of his bicycle. After the grueling wartime years, the chain-smoking, Chianti-loving, 34-year-old underdog came back to win the 1948 Tour de France, an exhilarating performance that helped unite his fractured homeland. Based on nearly ten years of research, *Road to Valor* is the first book ever written about Bartali in English and the only book written in any language to explore the full scope of Bartali's wartime work. An epic tale of courage, resilience, and redemption, it is the untold story of one of the greatest athletes of the twentieth century.

Robert Ludlum's (TM) The Bourne Objective Eric Van Lustbader 2010-06-01 A Jason Bourne novel from the #1 New York Times bestselling author Facing down mercenaries in Africa, Jason Bourne witnesses the death of an art dealer named Tracy Atherton. Her killing dredges up snatches of Bourne's impaired memory, in particular the murder of a young woman on Bali who entrusted him with a strangely

engraved ring—an artifact of such powerful significance that people have killed to obtain it. Now he's determined to find the ring's owner and purpose. But Bourne never knows what terrible acts he'll discover he committed when he digs into the past. The trail will lead him through layers of conspiracy to a vicious Russian mercenary, Leonid Arkadin, who was also a graduate of the Central Intelligence training program Treadstone. A covert course designed to create ruthless assassins for C.I., it was shuttered by Congress for corruption. Yet before it was dismantled, it produced Bourne and Arkadin, giving them equal skills, equal force, and equal cunning. As Bourne's destiny circles closer to Arkadin's, it becomes clear that the eventual collision of these men is not of their own making. Someone else has been watching and manipulating them. Someone who wants to know, Who is the more deadly agent?

Shadow Prey John Sandford 2020-07-14 A series of ritualistic murders committed across the United States draws Lucas Davenport into an unimaginable conspiracy of revenge in this “classic”(Boston Globe) thriller in the #1 New York Times bestselling series. A slumlord butchered in Minneapolis...A rising political star executed in Manhattan...A judge slashed to death in Oklahoma City... Each victim has a history of bad behavior, but the only thing the killings have in common is the murder weapon—a Native American ceremonial knife—and a trail of blood that leads to an embodiment of evil known only as Shadow Love. Recruited to be the lethal hand of a terrorist campaign, Shadow Love has his own bloody agenda, one he will do anything to achieve. Enlisted to find him are Minneapolis police lieutenant Lucas Davenport and New York City police

officer Lily Rothenburg. But despite the countrywide carnage they needn't look far. Because Shadow Love is right behind them.

Wilt, 1962 Gary M. Pomerantz 2010-06-02 On the night of March 2, 1962, in Hershey, Pennsylvania, right up the street from the chocolate factory, Wilt Chamberlain, a young and striking athlete celebrated as the Big Dipper, scored one hundred points in a game against the New York Knickerbockers. As historic and revolutionary as the achievement was, it remains shrouded in myth. The game was not televised; no New York sportswriters showed up; and a fourteen-year-old local boy ran onto the court when Chamberlain scored his hundredth point, shook his hand, and then ran off with the basketball. In telling the story of this remarkable night, author Gary M. Pomerantz brings to life a lost world of American sports. In 1962, the National Basketball Association, stepchild to the college game, was searching for its identity. Its teams were mostly white, the number of black players limited by an unspoken quota. Games were played in drafty, half-filled arenas, and the players traveled on buses and trains, telling tall tales, playing cards, and sometimes reading Joyce. Into this scene stepped the unprecedented Wilt Chamberlain: strong and quick-witted, voluble and enigmatic, a seven-footer who played with a colossal will and a dancer's grace. That strength, will, grace, and mystery were never more in focus than on March 2, 1962. Pomerantz tracked down Knicks and Philadelphia Warriors, fans, journalists, team officials, other NBA stars of the era, and basketball historians, conducting more than 250 interviews in all, to recreate in painstaking detail the game that announced the Dipper's greatness. He brings us to Hershey, Pennsylvania, a sweet-seeming model of the gentle, homogeneous small-town America that was fast becoming anachronistic. We see the fans and players, alternately fascinated and confused by Wilt, drawn anxiously into the spectacle. Pomerantz portrays the other legendary figures in this story: the Warriors' elegant coach Frank McGuire; the beloved, if rumpled, team owner Eddie Gottlieb; and the irreverent p.a. announcer Dave "the Zink" Zinkoff, who handed out free salamis courtside. At the heart of the book is the self-made Chamberlain, a romantic cosmopolitan who owned a nightclub in Harlem and shrugged off segregation with a bebop cool but harbored every slight deep in his psyche. March 2, 1962, presented the awesome sight of Wilt Chamberlain imposing himself on a world that would diminish him. *Wilt, 1962* is not only the dramatic story of a singular basketball game but a meditation on small towns, midcentury America, and one of the most intriguing figures in the pantheon of sports heroes. Rising Above Gregory Zuckerman 2016-05-03 Discover inspirational real-life stories of superstar athletes in this collection of sports biographies featuring LeBron James, Stephen Curry, Tim Howard, and more! Team

USA goalkeeper Tim Howard was diagnosed with Tourette Syndrome in 6th grade. He went on to become a national treasure after single-handedly keeping America competitive in the 2014 World Cup. Stephen Curry was told he was too small, too weak, and too slow to even receive a scholarship to play college basketball. He outworked everyone and went on to become MVP of the National Basketball Association. Jim Abbott was born without his right hand, yet he refused to be defined by what he lacked. He went on to pitch a no-hitter in the Major Leagues. Athlete after athlete in this book found discipline, hope, and inspiration on the playing field, rising above their circumstances. Filled with first-hand accounts from stars who exemplify the idea of enduring at all costs, this collection of sports biographies will serve as a must-read source of inspiration for kids and sports fans of all ages. Praise for *Rising Above* A Scholastic Teacher magazine Summer Reading List selection A Milwaukee Journal Sentinel Summer Reading List selection "An easy pitch for middle school sports lovers."--School Library Journal "This collection of mini-bios about athletes who overcame major obstacles packs a powerful message—perseverance and passion pay off. Even non-sports fans will cheer for superstars like LeBron James and Stephen Curry."--Scholastic Teacher "So many of the obstacles that these athletes share are retold using personal interviews and primary source material that young readers will find very relatable. [T]heir stories have morals that are easily transferred to life off the court or the field. The highly relevant message is that no situation is too dire or insurmountable with the right attitude and that young people shouldn't allow setbacks to define them."--Booklist "[O]ften inspiring . . . The underdog stories reveal that dedication and perseverance pay off, as well as that sports can serve as needed outlets and refuges."--Publishers Weekly "I would rate this a 9 1/2 . . . it touch[es] your heart very often with the ways these athletes turn[ed] their lives around."--Colorado Kids

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

An Illustrated History of Health and Fitness, from Pre-History to our Post-Modern World Roy J. Shephard 2014-11-27 This book examines the health/fitness interaction in an historical context. Beginning in primitive hunter-gatherer communities, where survival required adequate physical activity, it goes on to consider changes in health and physical activity at subsequent stages in the evolution of "civilization." It focuses on the health impacts of a growing understanding of medicine and physiology, and the emergence of a middle-class with the time and money to choose between active and passive leisure pursuits. The book reflects on urbanization and industrialization in relation to the need for public health measures, and the ever-diminishing physical demands of the work-place. It then evaluates the attitudes of prelates, politicians, philosophers and teachers at each stage of the process. Finally, the book explores professional and governmental initiatives to increase public involvement in active leisure through various school, worksite, recreational and sports programmes.

The Franchise Michael MacCambridge 1998-10-14 "It's All Part of the Game" dramatically recounts how, against the odds, "Sports Illustrated" grew from a misbegotten enterprise into a cultural institution. From halting editorial beginnings, "Sports Illustrated" has evolved into a journalistically tough and visually spectacular magazine that remains one of the truly influential voices in journalism. photo insert.

The Center Cannot Hold Elyn R. Saks 2007-08-14 A much-praised memoir of living and surviving mental illness as well as "a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy" (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. The Center Cannot Hold is the eloquent, moving story of Elyn's life, from the first time

that she heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written memoir is destined to become a classic in its genre.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents.

The Age of Surveillance Capitalism Shoshana Zuboff 2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total

certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

The Signal and the Noise Nate Silver 2015-02-03 UPDATED FOR 2020 WITH A NEW PREFACE BY NATE SILVER "One of the more momentous books of the decade." –The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the "prediction paradox": The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their

success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.

Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris 2021-08-16 Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.
